

Privacy Policy

This privacy policy has been compiled to better serve those who are concerned with how their 'Personally identifiable information' (PII) is being used online. PII, as used in US privacy law and information security, is information that can be used on its own or with other information to identify, contact, or locate a single person, or to identify an individual in context. Our Privacy Policy is very simple however we recommend you to read it carefully to get a clear understanding of how we collect, use, protect or otherwise handle your Personally Identifiable Information in accordance with our app.

What is “personally identifiable information”?

As legally defined, personally identifiable information refers to details collected on the Internet about an individual consumer, including an individual's first and last name, a physical street address, an email address, a telephone number, a Social Security number, or any other information that permits a specific individual to be contacted physically or online. The term extends to details such as a person's birthday, height, weight or hair color that are collected online and stored by an operator in personally identifiable form.

California Online Privacy Protection Act (CalOPPA)

CalOPPA is the first state law in the nation to require commercial websites, mobile application and online services to post a privacy policy. The law's reach stretches well beyond California to require a person or company in the United States (and conceivably the world) that operates websites collecting personally identifiable information from California consumers to post a conspicuous privacy policy on its website stating exactly the information being collected and those individuals with whom it is being shared, and to comply with this policy. - See more at:

<http://consumercal.org/california-online-privacy-protection-act-caloppa/#sthash.0FdRbT51.dpuf>

Who does CalOPPA apply to?

CalOPPA applies to any person or entity that owns or operates a commercial website or online service that collects and maintains personally identifiable information from a consumer residing in California who uses or visits said website or online service. CalOPPA does not apply to Internet service providers or similar entities that transmit or store personally identifiable information for a third party.

In 2012, the California Attorney General's Office specifically applied CalOPPA to mobile applications for smartphones and tablets that collect personally identifiable information. Hundreds of apps providers were notified that they were in violation of CalOPPA, and they were given 30 days to submit compliance plans or face fines of up to \$2,500 for each time their app was downloaded.

What personal information do we collect from the people that visit our app?

When registering on our app, as appropriate, you may be asked to enter your phone number to help you with your experience.

Contacts

MelodyGram uses phone numbers as only identifiers.

We store your contacts in order automatically add and sync your phone directory contacts to your MelodyGram contact section once they sign up for MelodyGram.

Chats

We do not store your messages, voice messages, documents or photos in our servers more than 14 days in order to assure you on protecting your privacy. You are the only one who can keep and store your data in your MelodyGram app account or you can email the chat history for a backup anytime you wish. Once the message is deleted it's gone forever!

Disappearing Chats

Again the disappearing chats will not be kept in our servers more than 14 days.

You are the only person who has complete control over your chat using the disappearing chat means that once you turn the disappearing feature on whatever you share with your friends after being automatically deleted in a few seconds it will be gone forever! And nobody can take screenshot of your chat, photo or other data within MelodyGram. You are completely safe within MelodyGram!

Music with Voice Message:

We do not connect you with third party apps, website or any other social network to give you access to our music. We simply upload and put the music tracks in our music store and you can choose the music from there to combine it with your voice message. You can use the free music tracks as free and you will be asked to pay for the premium packages of music tracks through your Google account.

Sharing Data

We never share your data with anyone.

Storing Data

MelodyGram does not keep your data for a long period of time in the servers.

Third Party Disclosure

We do not sell, trade, or otherwise transfer to outside parties your personally identifiable information. However, non-personally identifiable visitor information may be provided to other parties for marketing, advertising, or other uses.

Third party links

We do not include or offer third party products or services on our app.

If there are any questions regarding this privacy policy you may contact us using the information below.
